

The first topical formulation that relaxes muscles around the eyes

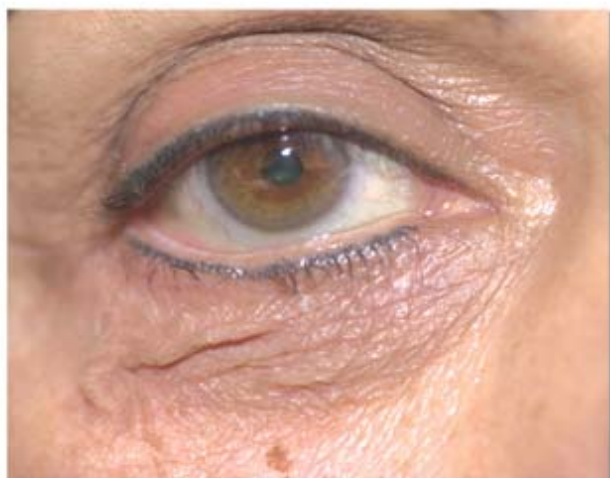

SkinRenu™ Intensive Serum W

Contains unique ingredients that help to relax the muscles associated with wrinkles. Specially developed formulation which can quickly replace the skins natural lipids, restore the level of GAG's and stimulate the production of collagen, thereby firming and toning the skin. Continued use can relax the muscle in the treated area, reducing muscular contractions that cause expression lines, especially those around the eyes. Actually relaxes muscles without the unpleasant side effects of Botulinum toxin type A.

SkinRenu™ Anti-Wrinkle Fineline Reducing Formula

Formulation specially developed to naturally complement **Intensive Serum W** in the treatment of wrinkles in the eye area by supplementing the skin with the precise mixture, and type of lipids that are lost with aging. In a few days, the skin becomes softer and smoother to the touch.
